# About Us *woman owned*

## Woman-Owned Business

CSS is certified as a Woman-Owned Business (WOB) by the State of Minnesota. Being “certified” is not just a label, however. It means our company meets strict state diversity business eligibility and certification requirements. It also signifies that we have completed a rigorous application process in order to achieve this certification.

### **Diversity Businesses Are Vital:**

Diversity businesses and consumers are a growing and vital force in the U.S. economy. It is no longer just “trendy” to work with diversity entrepreneurs, it makes really good business sense. This is a whole

business segment that provides jobs, products and services, and generates wealth for their communities. Many companies find that there are distinct advantages to establishing a supplier and/or contractor diversity program.

## Helping you fulfill vendor and contract-specific diversity goals.

As a WOB, CSS can help our corporate partners fulfill vendor and contract-specific diversity goals. Doing business with us will also help you reap the benefits of working with diversity.
