# Before and After Cable Management Install

## CASE STUDY

*Before*

Panduit cable managers also provides Deli Express the flexibility for future system expansion and upgrades.

Deli Express consulted with Communication Systems Specialists (CSS) to better organize their data cabling network. Deli Express' cabling system was originally installed in the mid-1990's. While their system was still operating well with the current network requirements, the IT staff was interested in organizing the cable plant to better facilitate future troubleshooting.

CSS installed Panduit's PatchRunner PRV6 vertical and NCMHF1 horizontal network cable managers, as well as Belden Media-twist patch cables to create a much more organized, clean patching system. This installation offers better accessibility and standardization of patch cords. The high-density design of the

*After*

CSS designs and installs structured cabling for commercial, industrial, and educational markets. Call on us to find out what we can do for your network.

Whether installing new cabling or cleaning up an existing installation, CSS will provide a solution that is right for your and your budget.
