

Data Center Services

We Install *Quality!*

SERVICES COMPLETED:

- Design/build
- MRJ21 copper gigabit ports
- 50 Micron 10Gig fiber
- Rack systems
- Basket tray installation
- Project Management

CASE STUDY

CSS was contracted by a Twin Cities pharmacy benefit management company to provide design/build and installation services for their (2) new Data Centers in the Twin Cities suburbs.

CSS provided design support and recommended products to compliment a fast-paced growing company. From the cable management pathways to rack systems, the project is designed to allow for quick installation of additional ports while providing a clean professional look.

Construction consisted of more than 2,400 stands of 50 Micron 10Gig Panduit Quicknet MTP fiber ports and more than 2,500 Tyco MRJ21 Gigabit Ethernet ports. As well as network rack equipment, cabinets and basket tray conveyance systems within the Data Center.
