

We Install *Quality!*

Expansion & Remodel

SERVICES COMPLETED

- Design/Build
- Communications cabling
- New Wiring Closet
- Paging and Sound Masking system
- Samsung 46" LCD TV's
- Abandoned cable removal and recycling

CASE STUDY

CSS was contracted by Värde Partners, Inc. to provide design/build and installation services for an expansion and remodel project. Värde Partners, an investment advisory firm specializing in alternative investments, was looking to expand their existing office space in the Normandale Lake Office Park in Bloomington. CSS built out the 16th floor (their new second floor) and remodeled the 15th floor (existing floor).

AutoCAD was used to design-build the customer a new wiring closet and develop a cabling plan to better manage and coordinate future changes and growth. This project also included installation of 900 Category 5E cables, Paging and Sound Masking throughout the space; 48 Category 6E cables between the Server room and new Wiring Closet; 5 new Samsung 46-inch LCD televisions for the trading floor area. CSS uninstalled out-dated cabling (abandoned cable) and removed it from the site to be recycled.

CUSTOMER TESTIMONIAL

"When we chose to add a second floor to our office space, we relied on Communication Systems Specialists for our cabling needs. From start to finish, Chad Peterson and the CSS team impressed us with their outstanding customer service. Whether we had questions, made last minute changes, or needed to troubleshoot the quirks of our building's infrastructure, CSS quickly responded and always went the extra mile to provide solutions and to make sure the job was done right. It is refreshing to find professionals like the CSS team who provide such dedicated personal attention and high-caliber workmanship."
